How to read this report

"Ahead of 39 in 100"
How many students out of 100 in Class 10 this result is ahead of.

"Top 8%"
Only about 8 of every 100 Class 10 students scored higher.

"Likely range"
From one sitting, the true level almost certainly falls inside that range.

Strip & marker

Where you sit today, from "room to grow" to "strong".

The 7 bands

Exceptionally high · Very high · Above average · Average (upper half) · Average (lower half) · Developing · Still emerging

Zone tags & colours

STRENGTH · SOLID · FOCUS AREA — Each brain zone keeps its own colour on every page.

01 · THE SCORE, EXPLAINED

01 Rohan Deshpande (Sample) — IQ Assessment — the score, explained

WHAT IS AN IQ TEST?

An IQ (Intelligence Quotient) cognitive test is a standardized assessment designed to measure a person's mental capabilities, reasoning skills, and intellectual potential relative to their age group.

"Cognitive" only means thinking — noticing, reasoning, remembering.

What this test measured

- **Patterns**— finding the hidden rule in a grid
- **Sequences**— working out what comes next
- **Visual detail**— spotting small differences
- **Numbers**— seeing the pattern inside numbers
- **Shapes**— turning shapes in your head
- **Memory**— holding things in mind while using them

WHAT IT DOES NOT MEASURE

Creativity · Kindness · Humour · Leadership · Effort · Curiosity · Talent

Most of what makes a person good at life is not on this page.

CAN THE SCORE CHANGE?

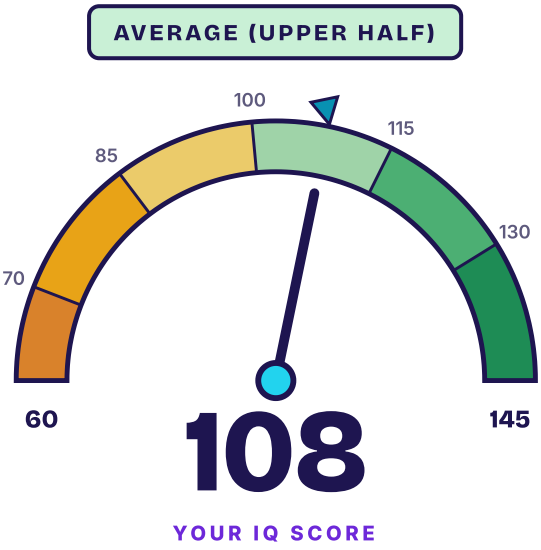

Yes — especially at school age, while the brain is still wiring itself. Puzzles, chess, reading, music and proper sleep all help.

Take the test again next year — and race your own score.

02 · YOUR IQ SCORE

02 Rohan Deshpande (Sample) — your IQ score

One number that compares your problem solving with students in your own class. The dial shows where today's score sits; the table shows what that band is called.

Such a score is attained by approximately **34.1%** of Class 10 students

Scored only against **Class 10** students

Higher than about **70 out of every 100** Class 10 students.

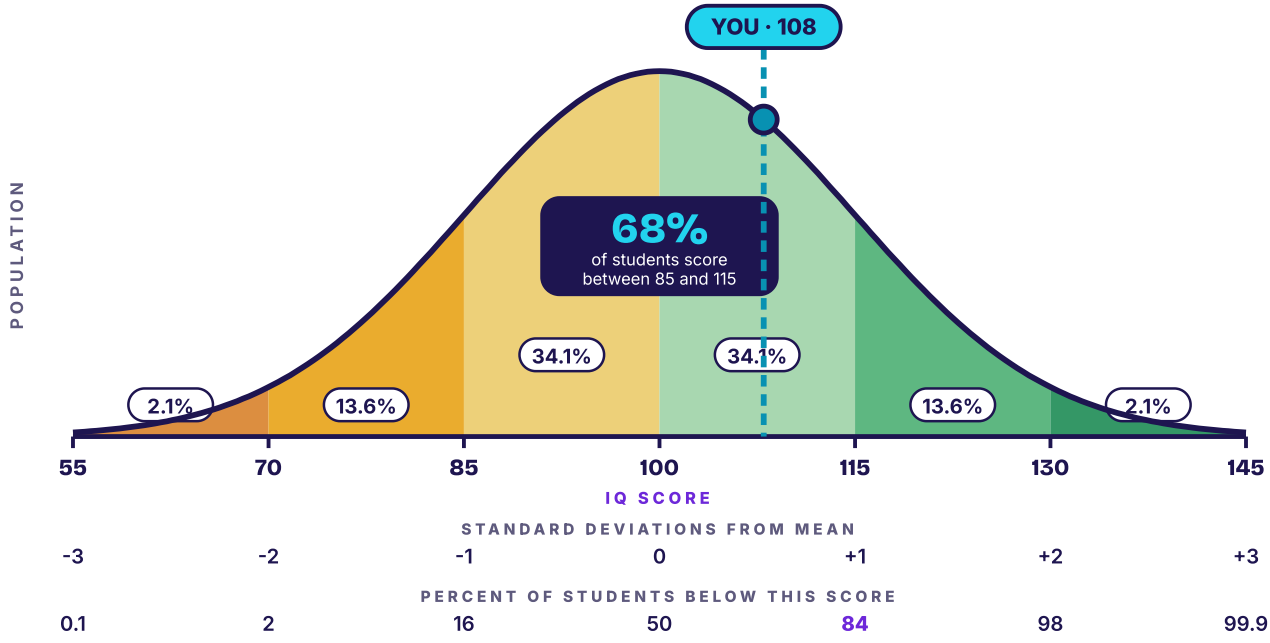

IQ SCORE CLASSIFICATION

SCORE RANGE	WHAT IT'S CALLED	HOW MANY STUDENTS
145+	Exceptionally high	0.1%
130–144	Very high	2.1%
115–129	Above average	13.6%
100–114 ← you	Average (upper half)	34.1%
85–99	Average (lower half)	34.1%
70–84	Developing	13.6%
under 70	Still emerging	2.3%

03 · WHERE YOU STAND

03 Rohan Deshpande (Sample) — where you stand — the bell curve

Every Class 10 student sits somewhere on this curve. The tall middle is where most people are; the thin tails are the rare scores.

Your marker sits at 108, in the top 30% for Class 10.

About 68 of every 100 students land in the two middle rows — that is what "average" means: the biggest, most crowded part of the curve, not a problem to fix.

ACROSS YOUR 6 BRAIN ZONES:

4	1	1
STRENGTH	SOLID	FOCUS AREA

Logical Reasoning · top 8%

Attempted all 91 questions

04 · YOUR SCORES AT A GLANCE

04 Rohan Deshpande (Sample) — your scores at a glance — the formal table

The same numbers a school counsellor or psychologist would read.

SCALE	SCORE	STANDING	LIKELY RANGE	DESCRIPTOR
Overall IQ score	**108** (range 103–113)	Top 30% (70th percentile)	Top 25%–50%	**Average (upper half)**
Abstract Reasoning	—	Top 15% (85th percentile)	Top 10%–25%	Above average
Logical Reasoning STRONGEST	—	Top 8% (92nd percentile)	Top 1%–10%	Above average
Visual Perception TO WORK ON	—	Ahead of 39 in 100 (39th percentile)	Top 50%–75%	Average (lower half)
Numerical Reasoning	—	Top 23% (77th percentile)	Top 10%–25%	Average (upper half)
Spatial Reasoning	—	Top 44% (56th percentile)	Top 25%–50%	Average (upper half)
Working Memory	—	Top 21% (79th percentile)	Top 10%–25%	Average (upper half)

HOW TO READ "STANDING"

"Top 9%" means only about 9 of every 100 Class 10 students scored higher. "Likely range" is the honest version — from one sitting, the true level almost certainly falls inside that range. Any test is a one-day snapshot; sleep, mood and surroundings move it.

05 · YOUR 6 BRAIN ZONES

Rohan Deshpande (Sample) — your 6 brain zones

Each zone is scored separately against your own class. The marker shows where you sit today, and the strip runs from "room to grow" on the left to "strong" on the right.

ABSTRACT REASONING

85 ahead of 85 in 100

ROOM TO GROW — STRONG

Spotting the hidden rule inside a grid of shapes — the classic "which figure comes next" puzzle.

VISUAL PERCEPTION

39 ahead of 39 in 100

ROOM TO GROW — STRONG

Noticing tiny differences and details that most people scan straight past.

SPATIAL REASONING

56 ahead of 56 in 100

ROOM TO GROW — STRONG

Rotating and folding shapes in your head without touching them.

108

IQ SCORE · CLASS 10

LOGICAL REASONING

92 ahead of 92 in 100

ROOM TO GROW — STRONG

Working out what comes next in a series and why — logic that moves in a line.

NUMERICAL REASONING

77 ahead of 77 in 100

ROOM TO GROW — STRONG

Finding the pattern inside numbers — not calculation speed, but number sense.

WORKING MEMORY

79 ahead of 79 in 100

ROOM TO GROW — STRONG

Holding several things in mind at once while doing something with them.

Each number is how many students out of 100 in Class 10 this result is ahead of. The six abilities are measured by the questions answered — this is not a map of the brain, and no part of a score belongs to a part of the head.

06 · SUPERPOWER AND LEVEL-UP ZONE

06 Rohan Deshpande (Sample) — your superpower and your level-up zone

SUPERPOWER

Logical Reasoning

Logical Reasoning — your highest score today: Top 8% of Class 10.

In plain words: working out what comes next in a series and why — logic that moves in a line.

Use it: choose projects, subjects and hobbies where this shines — Algebra, programming logic, science method, competitive exams.

In everyday life: This is the skill you use when following multi-step instructions, planning a route, or predicting the next step of an experiment.

Keep it sharp: Timed series sections from aptitude papers — a strength left alone drifts back toward the middle.

LEVEL-UP ZONE

Visual Perception

Visual Perception — your lowest score today (still ahead of 39 in 100 of Class 10). Not a weakness — simply the ability where practice pays fastest.

Why it matters: This is proofreading power, the eye that catches the one wrong digit in a bill, and the ability to spot what changed in a diagram.

The plan: 10 minutes a day for 30 days (p. 15). Students who keep it up often move this ability up a full band by next year's test.

Start here: Timed figure comparison — fifteen seconds each

A low zone is not a verdict on Rohan — it is simply the ability that has had the least practice so far, and the one where effort shows up fastest.

What these mean: your Superpower is simply the ability where you scored highest today. Your Level-up zone is the ability with the most room to grow — practising it gives the fastest improvement, which is why your 30-day plan targets it.

07 · ZONE BY ZONE · WHAT IT MEANS FOR YOU

07 Rohan Deshpande (Sample) — zone by zone — what it means for you

- Still emerging

This ability sits in **Above average** — compared only with Class 10 students.

16 of 16 questions answered

IN REAL LIFE

This is the skill you use when following multi-step instructions, planning a route, or predicting the next step of an experiment.

WHAT ROHAN'S RESULT MEANS

Rohan scored higher than about 92 of every 100 Class 10 students here — Logical Reasoning is a genuine strength to build a study style around.

Practice ideas

1. Timed series sections from aptitude papers
2. Alternating series: two rules woven together
3. Plan a week backwards from a deadline

Where it pays off: Algebra, programming logic, science method, competitive exams.

ZONE 2 OF 6

Abstract Reasoning

nickname: **Pattern Detective**

STRENGTH

Spotting the hidden rule inside a grid of shapes — the classic "which figure comes next" puzzle.

Top 15%

ROOM TO GROW — STRONG

BAND · CLASS 10

Exceptionally high	
Very high	
Above average	← Rohan
Average (upper half)	
Average (lower half)	
Developing	
Still emerging	

This ability sits in **Above average** — compared only with Class 10 students.

16 of 16 questions answered

IN REAL LIFE

In real life this is the skill behind noticing that a maths problem is the same type you solved last week, or that a story is heading somewhere familiar.

WHAT ROHAN'S RESULT MEANS

Rohan is comfortably ahead of most of Class 10 in Abstract Reasoning — higher than about 85 in 100 students. Regular light practice keeps this climbing.

Practice ideas

1. Timed matrix sets — accuracy first, then speed
2. Two-rule grids: shape AND shading changing together
3. Reverse-engineer the rule in a price chart or fixture list

Where it pays off: Mathematics, physics, coding, chess, and any exam with reasoning sections.

ZONE 3 OF 6

Working Memory

nickname: **Memory Master**

STRENGTH

Holding several things in mind at once while doing something with them.

Top 21%

Average (upper half)	← Rohan
Average (lower half)	
Developing	
Still emerging	

This ability sits in **Average (upper half)** — compared only with Class 10 students.

11 of 11 questions answered · fewer questions than the other zones — read as a rough guide

IN REAL LIFE

This is the skill behind mental arithmetic, remembering a phone number long enough to type it, and following a long instruction without notes.

WHAT ROHAN'S RESULT MEANS

Rohan is comfortably ahead of most of Class 10 in Working Memory — higher than about 79 in 100 students. Regular light practice keeps this climbing.

Practice ideas

1. Backward span 6+, timed drills
2. Card-sequence recall: six cards, one look
3. Summarise a page from memory before re-reading it

Where it pays off: Every subject — this is the workspace all other thinking happens in.

ZONE 4 OF 6

Numerical Reasoning

nickname: **Number Ninja**

STRENGTH

Finding the pattern inside numbers — not calculation speed, but number sense.

Top 23%

ROOM TO GROW — STRONG

BAND · CLASS 10

Exceptionally high	
Very high	
Above average	
Average (upper half) ← Rohan	
Average (lower half)	
Developing	
Still emerging	

This ability sits in **Average (upper half)** — compared only with Class 10 students.

16 of 16 questions answered

IN REAL LIFE

This is the skill behind estimating whether a shop's discount is actually good, or sensing that an answer is far too large before you check it.

WHAT ROHAN'S RESULT MEANS

Rohan is comfortably ahead of most of Class 10 in Numerical Reasoning — higher than about 77 in 100 students. Regular light practice keeps this climbing.

Practice ideas

1. Timed number-series sections
2. Prime, square, triangular — classify numbers fast
3. Data interpretation: read the table, answer in seconds

Where it pays off: Mathematics, accountancy, economics, data work, engineering entrance exams.

ZONE 5 OF 6

Spatial Reasoning

nickname: **Shape Shifter**

SOLID

Rotating and folding shapes in your head without touching them.

Top 44%

ROOM TO GROW — STRONG

BAND · CLASS 10

Exceptionally high	
Very high	
Above average	
Average (upper half) ← Rohan	
Average (lower half)	
Developing	
Still emerging	

This ability sits in **Average (upper half)** — compared only with Class 10 students.

16 of 16 questions answered

IN REAL LIFE

This is what lets you pack a suitcase efficiently, read a map, or picture how a flat-pack turns into furniture.

WHAT ROHAN'S RESULT MEANS

Rohan is in the solid middle of Class 10 for Spatial Reasoning — ahead of about 56 in 100 students, with clear headroom to grow.

Practice ideas

1. Timed rotation and folding sections
2. Count hidden cubes in stacked figures
3. Mechanical diagrams: which gear turns which way?

Where it pays off: Geometry, engineering, architecture, surgery, design, aviation.

Zone by zone — what it means for you

ZONE 6 OF 6 · your level-up zone

Visual Perception

nickname: **Eagle Eye**

FOCUS AREA

Noticing tiny differences and details that most people scan straight past.

Ahead of 39 in 100

ROOM TO GROW — STRONG

BAND · CLASS 10

- Exceptionally high
- Very high
- Above average
- Average (upper half)
- **Average (lower half)** ← Rohan
- Developing
- Still emerging

This ability sits in **Average (lower half)** — compared only with Class 10 students.

16 of 16 questions answered

IN REAL LIFE

This is proofreading power, the eye that catches the one wrong digit in a bill, and the ability to spot what changed in a diagram.

WHAT ROHAN'S RESULT MEANS

Visual Perception is currently Rohan's biggest opportunity — ahead of about 39 in 100 Class 10 students today. The exercises below are exactly how this number moves.

Practice ideas

1. Timed figure comparison — fifteen seconds each
2. Data-checking: find the wrong entry in a table
3. Rotation vs reflection sets — no drawing, all in the head

Where it pays off: Biology diagrams, geometry, design, medicine, quality-checking work, editing.

08 · 30-DAY WORKOUT AND 90-DAY PLAN

08 Rohan Deshpande (Sample) — your 30-day workout — and the 90-day path

A four-week practice plan written for you, the student, built around your level-up zone — Visual Perception.

WEEK 1

Ten minutes a day of the timed version — accuracy first, speed second.

WEEK 2

Raise the difficulty: two rules at once, or one less second.

WEEK 3

Mixed set, no warm-up — start cold, the way an exam does.

WEEK 4

Full set under time, then review only what you got wrong.

How to use it: ten minutes a day, phone timer on. Each week gets slightly harder on purpose — abilities grow at the edge of comfortable. An unbroken streak beats any single long session.

Nothing to buy: paper and pencil, a deck of cards, a free puzzle app, or the puzzle page of any newspaper.

STREAK TRACKER · TICK A BOX EACH DAY

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
16	17	18	19	20	21	22	23	24	25	26	27	28	29	30

After 30 days — the 90-day path

Then run the same ten minutes at the next ability. Three rounds is 90 days, and by then the first has become habit.

DAYS 1–30

Visual Perception

Timed figure comparison — fifteen seconds each

DAYS 31–60

Spatial Reasoning

Timed rotation and folding sections

DAYS 61–90

 # Numerical Reasoning

Timed number-series sections

Practice sharpens the ability itself — not a shortcut to a bigger number.

09 · YOUR GROWTH STORY

09 Rohan Deshpande (Sample) — your growth story

Take it again next year — this box fills with your own line.

10 · FOR PARENTS

10 Rohan Deshpande (Sample) — for parents — what to actually do

- **Praise the strength by name.** Say: "Your Logical Reasoning is a real strength." Specific praise works better than "well done".
- **Do the first week together.** The 30-day plan (p. 15) takes 10 minutes a day. Sit with Rohan for the first few days, then let Rohan own it.
- **Keep puzzles fun.** They are play, not extra homework. One puzzle a day is enough.
- **Book next year's test now.** Same season next year. Then compare Rohan only with Rohan — that line matters more than today's number.
- **Two don'ts.** Don't use the score as a label. Don't compare with siblings or classmates. If anything worries you, talk to the school counsellor.
- **Tie it to the year ahead.** At Class 10 this feeds stream and entrance-exam choices — use it as one input, never the deciding one.
- **Protect sleep over extra hours.** At this age fatigue costs more marks than an extra revision hour gains.

11 · FOR THE COUNSELLOR / TEACHER

11 Rohan Deshpande (Sample) — for the counsellor / teacher

- **The picture in one line:** strong in Logical Reasoning (top 8%), needs practice in Visual Perception (ahead of 39 in 100). Overall: Average (upper half) for Class 10.
- **In class:** let Rohan use the strength openly — it builds confidence. Give short, easy practice tasks in Visual Perception — the weekly plan (p. 15) can be used as-is.
- **Two check-ins:** ask about the practice plan on day 15 and day 30. That alone doubles follow-through.
- **What next:** add a career-interest test this year — ability plus interest gives reliable stream advice. Retest next season on the Class 11 paper.
- **Age note:** at Class 10 this is most useful beside interest and attainment data — ability alone should not drive a stream decision.
- **At this age:** map the strength to subject combinations, and treat the growth zone as exam technique, not remediation.
- **What this result does not license:** it is a screening assessment, not a diagnosis. For any clinical question, refer Rohan to a psychologist.

Next steps

Start the 30-day workout

Visual Perception, ten minutes a day — p. 15.

Add a career-interest test

Pair this ability report with the Ideal Career Test™ on psychometrictest.ai.

Retest next year

Class 11 paper, same season — fill in the growth story on p. 16.
