How to read this report

"Ahead of 44 in 100"
How many students out of 100 in Class 5 this result is ahead of.

"Top 5%"
Only about 5 of every 100 Class 5 students scored higher.

"Likely range"
From one sitting, the true level almost certainly falls inside that range.

Strip & marker

ROOM TO GROW — STRONG

Where you sit today, from "room to grow" to "strong".

The 7 bands

Exceptionally high · Very high · Above average · Average (upper half) · Average (lower half) · Developing · Still emerging

Zone tags & colours

STRENGTH · SOLID · FOCUS AREA — Each brain zone keeps its own colour on every page.

01 · THE SCORE, EXPLAINED

01 Meher Bajwa (Sample) — IQ Assessment — the score, explained

WHAT IS AN IQ TEST?

An IQ (Intelligence Quotient) cognitive test is a standardized assessment designed to measure a person's mental capabilities, reasoning skills, and intellectual potential relative to their age group.

"Cognitive" only means thinking — noticing, reasoning, remembering.

What this test measured

- **Patterns**— finding the hidden rule in a grid
- **Sequences**— working out what comes next
- **Visual detail**— spotting small differences
- **Numbers**— seeing the pattern inside numbers
- **Shapes**— turning shapes in your head
- **Memory**— holding things in mind while using them

WHAT IT DOES NOT MEASURE

Creativity · Kindness · Humour · Leadership · Effort · Curiosity · Talent

Most of what makes a person good at life is not on this page.

CAN THE SCORE CHANGE?

Yes — especially at school age, while the brain is still wiring itself. Puzzles, chess, reading, music and proper sleep all help.

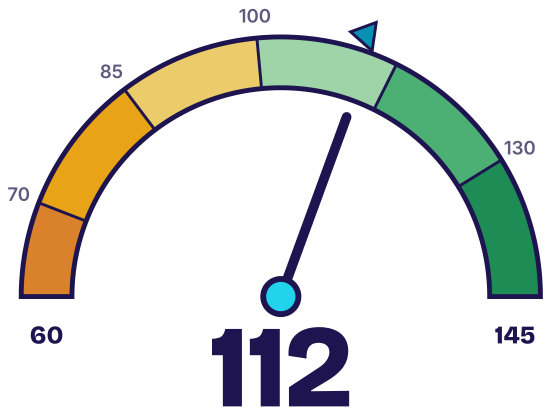

Take the test again next year — and race your own score.

02 · YOUR IQ SCORE

02 Meher Bajwa (Sample) — your IQ score

One number that compares your problem solving with students in your own class. The dial shows where today's score sits; the table shows what that band is called.

AVERAGE (UPPER HALF)

YOUR IQ SCORE

Such a score is attained by approximately **34.1%** of Class 5 students

Scored only against **Class 5** students

Higher than about **78 out of every 100** Class 5 students.

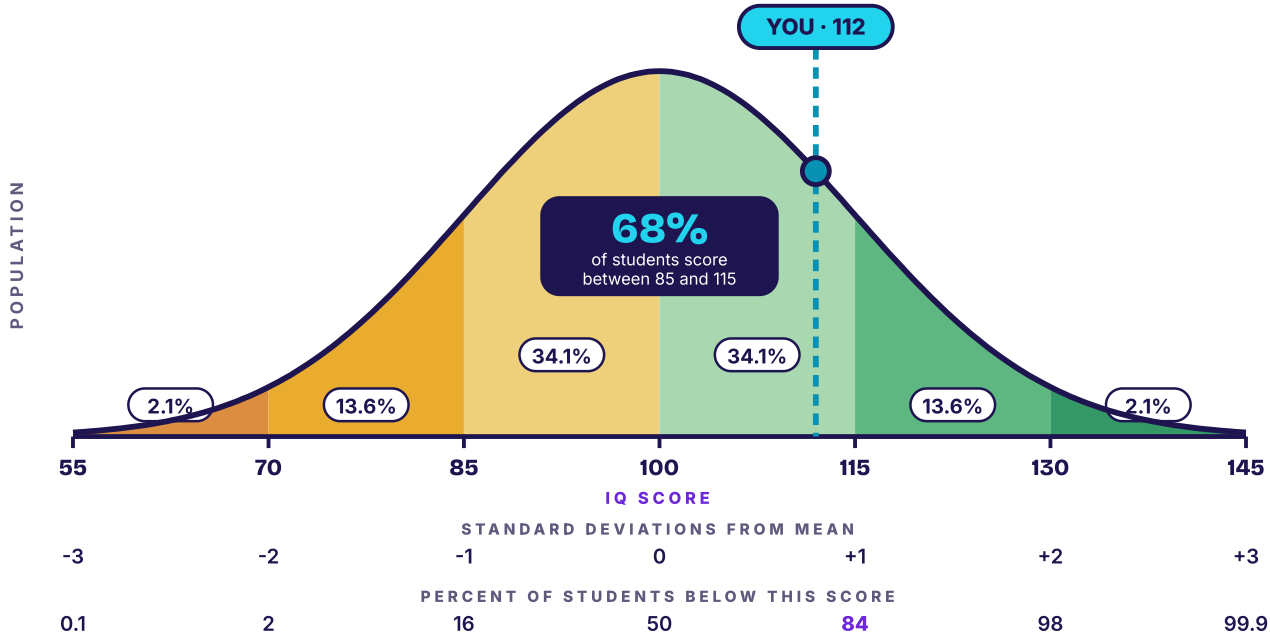

IQ SCORE CLASSIFICATION

SCORE RANGE	WHAT IT'S CALLED	HOW MANY STUDENTS
145+	Exceptionally high	0.1%
130–144	Very high	2.1%
115–129	Above average	13.6%
100–114 ← you	Average (upper half)	34.1%
85–99	Average (lower half)	34.1%
70–84	Developing	13.6%
under 70	Still emerging	2.3%

03 · WHERE YOU STAND

03 Meher Bajwa (Sample) — where you stand — the bell curve

Every Class 5 student sits somewhere on this curve. The tall middle is where most people are; the thin tails are the rare scores.

Your marker sits at 112, in the top 22% for Class 5.

About 68 of every 100 students land in the two middle rows — that is what "average" means: the biggest, most crowded part of the curve, not a problem to fix.

ACROSS YOUR 6 BRAIN ZONES:

4	2	0
STRENGTH	SOLID	FOCUS AREA

☆ Top 25% overall · Visual Perception · top 5% · ✓ Attempted all 51 questions

04 · YOUR SCORES AT A GLANCE

04 Meher Bajwa (Sample) — your scores at a glance — the formal table

The same numbers a school counsellor or psychologist would read.

SCALE	SCORE	STANDING	LIKELY RANGE	DESCRIPTOR
Overall IQ score	**112** (range 107–117)	Top 22% (78th percentile)	Top 10%–25%	**Average (upper half)**
Abstract Reasoning	—	Top 18% (82nd percentile)	Top 10%–25%	Average (upper half)
Logical Reasoning	—	Top 18% (82nd percentile)	Top 10%–25%	Average (upper half)
Visual Perception STRONGEST	—	Top 5% (95th percentile)	Top 1%–10%	Above average
Numerical Reasoning TO WORK ON	—	Ahead of 44 in 100 (44th percentile)	Top 50%–75%	Average (lower half)
Spatial Reasoning	—	Top 10% (90th percentile)	Top 10%–25%	Above average
Working Memory	—	Top 28% (72nd percentile)	Top 25%–50%	Average (upper half)

HOW TO READ "STANDING"

"Top 9%" means only about 9 of every 100 Class 5 students scored higher. "Likely range" is the honest version — from one sitting, the true level almost certainly falls inside that range. Any test is a one-day snapshot; sleep, mood and surroundings move it.

05 · YOUR 6 BRAIN ZONES

05 Meher Bajwa (Sample) — your 6 brain zones

Each zone is scored separately against your own class. The marker shows where you sit today, and the strip runs from "room to grow" on the left to "strong" on the right.

ABSTRACT REASONING

82 ahead of 82 in 100

ROOM TO GROW — STRONG

Spotting the hidden rule inside a grid of shapes — the classic "which figure comes next" puzzle.

VISUAL PERCEPTION

95 ahead of 95 in 100

ROOM TO GROW — STRONG

Noticing tiny differences and details that most people scan straight past.

SPATIAL REASONING

90 ahead of 90 in 100

ROOM TO GROW — STRONG

Rotating and folding shapes in your head without touching them.

112

IQ SCORE · CLASS 5

LOGICAL REASONING

82 ahead of 82 in 100

ROOM TO GROW — STRONG

Working out what comes next in a series and why — logic that moves in a line.

NUMERICAL REASONING

44 ahead of 44 in 100

ROOM TO GROW — STRONG

Finding the pattern inside numbers — not calculation speed, but number sense.

WORKING MEMORY

72 ahead of 72 in 100

ROOM TO GROW — STRONG

Holding several things in mind at once while doing something with them.

Each number is how many students out of 100 in Class 5 this result is ahead of. The six abilities are measured by the questions answered — this is not a map of the brain, and no part of a score belongs to a part of the head.

06 · SUPERPOWER AND LEVEL-UP ZONE

06 Meher Bajwa (Sample) — your superpower and your level-up zone

SUPERPOWER

Visual Perception

Visual Perception — your highest score today: Top 5% of Class 5.

In plain words: noticing tiny differences and details that most people scan straight past.

Use it: choose projects, subjects and hobbies where this shines — Biology diagrams, geometry, design, medicine, quality-checking work, editing.

In everyday life: This is proofreading power, the eye that catches the one wrong digit in a bill, and the ability to spot what changed in a diagram.

Keep it sharp: Spot-the-difference against a timer — a strength left alone drifts back toward the middle.

LEVEL-UP ZONE

 # Numerical Reasoning

Numerical Reasoning — your lowest score today (still ahead of 44 in 100 of Class 5). Not a weakness — simply the ability where practice pays fastest.

Why it matters: This is the skill behind estimating whether a shop's discount is actually good, or sensing that an answer is far too large before you check it.

The plan: 10 minutes a day for 30 days (p. 15). Students who keep it up often move this ability up a full band by next year's test.

Start here: Times-table sprints — one table a day

A low zone is not a verdict on Meher — it is simply the ability that has had the least practice so far, and the one where effort shows up fastest.

What these mean: your Superpower is simply the ability where you scored highest today. Your Level-up zone is the ability with the most room to grow — practising it gives the fastest improvement, which is why your 30-day plan targets it.

07 · ZONE BY ZONE · WHAT IT MEANS FOR YOU

07 Meher Bajwa (Sample) — zone by zone — what it means for you

ZONE 1 OF 6 · your superpower

Visual Perception

nickname: **Eagle Eye**

- Average (upper half)
- Average (lower half)
- Developing
- Still emerging

This ability sits in **Above average** — compared only with Class 5 students.

9 of 9 questions answered

IN REAL LIFE

This is proofreading power, the eye that catches the one wrong digit in a bill, and the ability to spot what changed in a diagram.

WHAT MEHER'S RESULT MEANS

Meher scored higher than about 95 of every 100 Class 5 students here — Visual Perception is a genuine strength to build a study style around.

Practice ideas

1. Spot-the-difference against a timer
2. Odd one out by a hidden rule — not the obvious one
3. Compare two similar pictures and list every difference

Where it pays off: Biology diagrams, geometry, design, medicine, quality-checking work, editing.

ZONE 2 OF 6

Spatial Reasoning

nickname: **Shape Shifter**

STRENGTH

Rotating and folding shapes in your head without touching them.

Top 10%

Above average	← Meher
Average (upper half)	
Average (lower half)	
Developing	
Still emerging	

This ability sits in **Above average** — compared only with Class 5 students.

9 of 9 questions answered

IN REAL LIFE

This is what lets you pack a suitcase efficiently, read a map, or picture how a flat-pack turns into furniture.

WHAT MEHER'S RESULT MEANS

Meher scored higher than about 90 of every 100 Class 5 students here — Spatial Reasoning is a genuine strength to build a study style around.

Practice ideas

1. Harder tangrams and pentomino fits
2. Origami from diagrams alone
3. Draw a shape, rotate the page, draw what you'd see

Where it pays off: Geometry, engineering, architecture, surgery, design, aviation.

ZONE 3 OF 6

Abstract Reasoning

nickname: **Pattern Detective**

STRENGTH

Spotting the hidden rule inside a grid of shapes — the classic "which figure comes next" puzzle.

Top 18%

Still emerging	

This ability sits in **Average (upper half)** — compared only with Class 5 students.

9 of 9 questions answered

IN REAL LIFE

In real life this is the skill behind noticing that a maths problem is the same type you solved last week, or that a story is heading somewhere familiar.

WHAT MEHER'S RESULT MEANS

Meher is comfortably ahead of most of Class 5 in Abstract Reasoning — higher than about 82 in 100 students. Regular light practice keeps this climbing.

Practice ideas

1. 4×4 Sudoku, ten minutes a day
2. Draw the next tile in a rangoli or border pattern
3. Find the repeating rule in a calendar or cricket scorecard

Where it pays off: Mathematics, physics, coding, chess, and any exam with reasoning sections.

Zone by zone — what it means for you

ZONE 4 OF 6

Logical Reasoning

nickname: **Sequence Surfer**

STRENGTH

Working out what comes next in a series and why — logic that moves in a line.

Top 18%

Average (upper half) ← Meher	
Average (lower half)	
Developing	
Still emerging	

This ability sits in **Average (upper half)** — compared only with Class 5 students.

9 of 9 questions answered

IN REAL LIFE

This is the skill you use when following multi-step instructions, planning a route, or predicting the next step of an experiment.

WHAT MEHER'S RESULT MEANS

Meher is comfortably ahead of most of Class 5 in Logical Reasoning — higher than about 82 in 100 students. Regular light practice keeps this climbing.

Practice ideas

1. Number series puzzles: +2, +4, +6 — find the rule
2. Write a recipe as numbered steps, no step missing
3. Continue the ladder: 1, 2, 4, 8...

Where it pays off: Algebra, programming logic, science method, competitive exams.

ZONE 5 OF 6

Working Memory

nickname: **Memory Master**

SOLID

Holding several things in mind at once while doing something with them.

Top 28%

ROOM TO GROW — STRONG

BAND · CLASS 5

Exceptionally high	
Very high	
Above average	
Average (upper half) ← Meher	
Average (lower half)	
Developing	
Still emerging	

This ability sits in **Average (upper half)** — compared only with Class 5 students.

6 of 6 questions answered · fewer questions than the other zones — read as a rough guide

IN REAL LIFE

This is the skill behind mental arithmetic, remembering a phone number long enough to type it, and following a long instruction without notes.

WHAT MEHER'S RESULT MEANS

Meher is in the solid middle of Class 5 for Working Memory — ahead of about 72 in 100 students, with clear headroom to grow.

Practice ideas

1. Memory-pairs with bigger grids — beat your time
2. 5 digits forwards, 4 backwards — daily
3. Remember three instructions, do them in order

Where it pays off: Every subject — this is the workspace all other thinking happens in.

Zone by zone — what it means for you

ZONE 6 OF 6 · your level-up zone

Numerical Reasoning

nickname: **Number Ninja**

SOLID

Finding the pattern inside numbers — not calculation speed, but number sense.

Ahead of 44 in 100

ROOM TO GROW — STRONG

BAND · CLASS 5

- Exceptionally high
- Very high
- Above average
- Average (upper half)
- **Average (lower half)** ← Meher
- Developing
- Still emerging

This ability sits in **Average (lower half)** — compared only with Class 5 students.

9 of 9 questions answered

IN REAL LIFE

This is the skill behind estimating whether a shop's discount is actually good, or sensing that an answer is far too large before you check it.

WHAT MEHER'S RESULT MEANS

Numerical Reasoning is currently Meher's biggest opportunity — ahead of about 44 in 100 Class 5 students today. The exercises below are exactly how this number moves.

Practice ideas

1. Times-table sprints — one table a day
2. Number series: spot the +3, +5, ×2 rules
3. Shop maths: total two items, check the change

Where it pays off: Mathematics, accountancy, economics, data work, engineering entrance exams.

08 · 30-DAY WORKOUT AND 90-DAY PLAN

08 Meher Bajwa (Sample) — your 30-day workout — and the 90-day path

A four-week practice plan written for you, the student, built around your level-up zone — Numerical Reasoning.

WEEK 1

Ten minutes of the easiest version, with a grown-up nearby.

WEEK 2

Same game, one step harder — a longer sequence or one more piece.

WEEK 3

Try it without help, and say the rule out loud.

WEEK 4

Mix all three, and teach the game to someone else.

How to use it: ten minutes a day, phone timer on. Each week gets slightly harder on purpose — abilities grow at the edge of comfortable. An unbroken streak beats any single long session.

Nothing to buy: paper and pencil, a deck of cards, a free puzzle app, or the puzzle page of any newspaper.

STREAK TRACKER · TICK A BOX EACH DAY

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
16	17	18	19	20	21	22	23	24	25	26	27	28	29	30

After 30 days — the 90-day path

Then run the same ten minutes at the next ability. Three rounds is 90 days, and by then the first has become habit.

DAYS 1–30

 # Numerical Reasoning

Times-table sprints — one table a day

DAYS 31–60

Working Memory

Memory-pairs with bigger grids — beat your time

DAYS 61–90

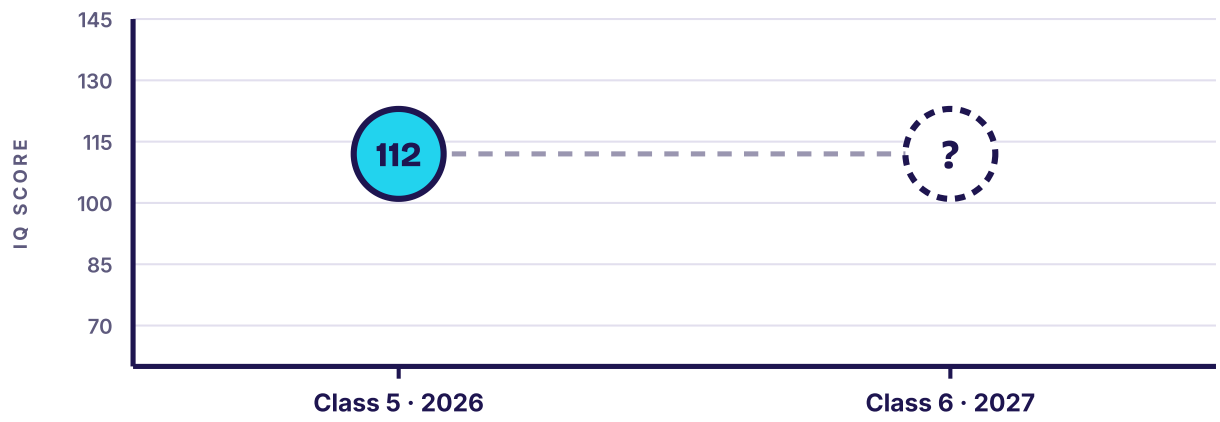

Abstract Reasoning

4×4 Sudoku, ten minutes a day

Practice sharpens the ability itself — not a shortcut to a bigger number.

09 · YOUR GROWTH STORY

09 Meher Bajwa (Sample) — your growth story

Take it again next year — this box fills with your own line.

10 · FOR PARENTS

10 Meher Bajwa (Sample) — for parents — what to actually do

- **Praise the strength by name.** Say: "Your Visual Perception is a real strength." Specific praise works better than "well done".
- **Do the first week together.** The 30-day plan (p. 15) takes 10 minutes a day. Sit with Meher for the first few days, then let Meher own it.
- **Keep puzzles fun.** They are play, not extra homework. One puzzle a day is enough.
- **Book next year's test now.** Same season next year. Then compare Meher only with Meher — that line matters more than today's number.
- **Two don'ts.** Don't use the score as a label. Don't compare with siblings or classmates. If anything worries you, talk to the school counsellor.
- **Keep it play.** At this age practice must look like a game. Ten minutes, on the floor, with you.
- **Never mention the number.** A child this age hears a score as a label. Talk about what they enjoyed.

11 · FOR THE COUNSELLOR / TEACHER

11 Meher Bajwa (Sample) — for the counsellor / teacher

- **The picture in one line:** strong in Visual Perception (top 5%), needs practice in Numerical Reasoning (ahead of 44 in 100). Overall: Average (upper half) for Class 5.
- **In class:** let Meher use the strength openly — it builds confidence. Give short, easy practice tasks in Numerical Reasoning — the weekly plan (p. 15) can be used as-is.
- **Two check-ins:** ask about the practice plan on day 15 and day 30. That alone doubles follow-through.
- **What next:** retest next season on the Class 6 paper.
- **Age note:** at Class 5 a single sitting moves easily with mood and attention — treat this as a wide, soft indication, not a placement.
- **At this age:** short bursts, concrete objects, lots of praise for the attempt rather than the answer.
- **What this result does not license:** it is a screening assessment, not a diagnosis. For any clinical question, refer Meher to a psychologist.

Next steps

Start the 30-day workout

Numerical Reasoning, ten minutes a day — p. 15.

Add a career-interest test

Pair this ability report with the Ideal Career Test™ on psychometrictest.ai.

Retest next year

Class 6 paper, same season — fill in the growth story on p. 16.
