How to read this report

"Ahead of 42 in 100"
How many students out of 100 in Class 6 this result is ahead of.

"Top 3%"
Only about 3 of every 100 Class 6 students scored higher.

"Likely range"
From one sitting, the true level almost certainly falls inside that range.

Strip & marker

ROOM TO GROW — STRONG

Where you sit today, from "room to grow" to "strong".

The 7 bands

Exceptionally high · Very high · Above average · Average (upper half) · Average (lower half) · Developing · Still emerging

Zone tags & colours

STRENGTH · SOLID · FOCUS AREA — Each brain zone keeps its own colour on every page.

01 · THE SCORE, EXPLAINED

01 Vihaan Rao (Sample) — IQ Assessment — the score, explained

WHAT IS AN IQ TEST?

An IQ (Intelligence Quotient) cognitive test is a standardized assessment designed to measure a person's mental capabilities, reasoning skills, and intellectual potential relative to their age group.

"Cognitive" only means thinking — noticing, reasoning, remembering.

What this test measured

- **Patterns**— finding the hidden rule in a grid
- **Sequences**— working out what comes next
- **Visual detail**— spotting small differences
- **Numbers**— seeing the pattern inside numbers
- **Shapes**— turning shapes in your head
- **Memory**— holding things in mind while using them

WHAT IT DOES NOT MEASURE

Creativity · Kindness · Humour · Leadership · Effort · Curiosity · Talent

Most of what makes a person good at life is not on this page.

CAN THE SCORE CHANGE?

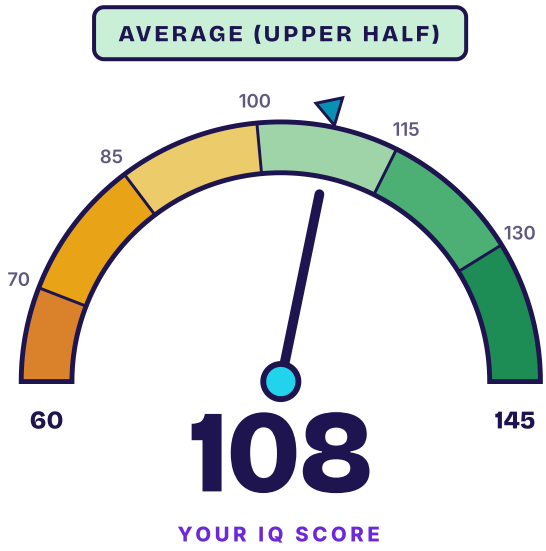

Yes — especially at school age, while the brain is still wiring itself. Puzzles, chess, reading, music and proper sleep all help.

Take the test again next year — and race your own score.

02 · YOUR IQ SCORE

02 Vihaan Rao (Sample) — your IQ score

One number that compares your problem solving with students in your own class. The dial shows where today's score sits; the table shows what that band is called.

Such a score is attained by approximately **34.1%** of Class 6 students

Scored only against **Class 6** students

Higher than about **70 out of every 100** Class 6 students.

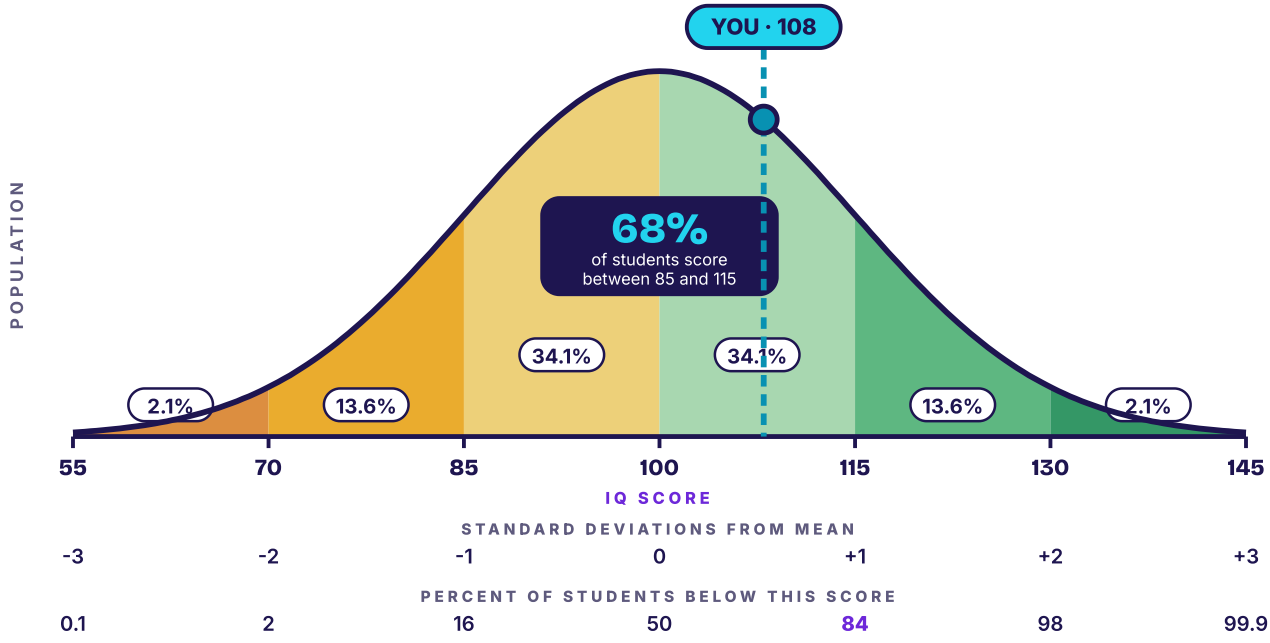

IQ SCORE CLASSIFICATION

SCORE RANGE	WHAT IT'S CALLED	HOW MANY STUDENTS
145+	Exceptionally high	0.1%
130–144	Very high	2.1%
115–129	Above average	13.6%
100–114 ← you	Average (upper half)	34.1%
85–99	Average (lower half)	34.1%
70–84	Developing	13.6%
under 70	Still emerging	2.3%

03 · WHERE YOU STAND

03 Vihaan Rao (Sample) — where you stand — the bell curve

Every Class 6 student sits somewhere on this curve. The tall middle is where most people are; the thin tails are the rare scores.

Your marker sits at 108, in the top 30% for Class 6.

About 68 of every 100 students land in the two middle rows — that is what "average" means: the biggest, most crowded part of the curve, not a problem to fix.

ACROSS YOUR 6 BRAIN ZONES:

04 · YOUR SCORES AT A GLANCE

04 Vihaan Rao (Sample) — your scores at a glance — the formal table

The same numbers a school counsellor or psychologist would read.

SCALE	SCORE	STANDING	LIKELY RANGE	DESCRIPTOR
Overall IQ score	**108** (range 103–113)	Top 30% (70th percentile)	Top 25%–50%	**Average (upper half)**
Abstract Reasoning	—	Top 32% (68th percentile)	Top 25%–50%	Average (upper half)
Logical Reasoning	—	Top 9% (91st percentile)	Top 1%–10%	Above average
Visual Perception	—	Top 9% (91st percentile)	Top 1%–10%	Above average
Numerical Reasoning STRONGEST	—	Top 3% (97th percentile)	Top 1%–10%	Above average
Spatial Reasoning	—	Ahead of 42 in 100 (42nd percentile)	Top 50%–75%	Average (lower half)
Working Memory TO WORK ON	—	Ahead of 25 in 100 (25th percentile)	Top 75%–99%	Average (lower half)

HOW TO READ "STANDING"

"Top 9%" means only about 9 of every 100 Class 6 students scored higher. "Likely range" is the honest version — from one sitting, the true level almost certainly falls inside that range. Any test is a one-day snapshot; sleep, mood and surroundings move it.

05 · YOUR 6 BRAIN ZONES

05 Vihaan Rao (Sample) — your 6 brain zones

Each zone is scored separately against your own class. The marker shows where you sit today, and the strip runs from "room to grow" on the left to "strong" on the right.

ABSTRACT REASONING

68 ahead of 68 in 100

ROOM TO GROW — STRONG

Spotting the hidden rule inside a grid of shapes — the classic "which figure comes next" puzzle.

VISUAL PERCEPTION

91 ahead of 91 in 100

ROOM TO GROW — STRONG

Noticing tiny differences and details that most people scan straight past.

SPATIAL REASONING

42 ahead of 42 in 100

ROOM TO GROW — STRONG

Rotating and folding shapes in your head without touching them.

108

IQ SCORE · CLASS 6

LOGICAL REASONING

91 ahead of 91 in 100

ROOM TO GROW — STRONG

Working out what comes next in a series and why — logic that moves in a line.

NUMERICAL REASONING

97 ahead of 97 in 100

ROOM TO GROW — STRONG

Finding the pattern inside numbers — not calculation speed, but number sense.

WORKING MEMORY

25 ahead of 25 in 100

ROOM TO GROW — STRONG

Holding several things in mind at once while doing something with them.

Each number is how many students out of 100 in Class 6 this result is ahead of. The six abilities are measured by the questions answered — this is not a map of the brain, and no part of a score belongs to a part of the head.

06 · SUPERPOWER AND LEVEL-UP ZONE

06 Vihaan Rao (Sample) — your superpower and your level-up zone

SUPERPOWER

 # Numerical Reasoning

Numerical Reasoning — your highest score today: Top 3% of Class 6.

In plain words: finding the pattern inside numbers — not calculation speed, but number sense.

Use it: choose projects, subjects and hobbies where this shines — Mathematics, accountancy, economics, data work, engineering entrance exams.

In everyday life: This is the skill behind estimating whether a shop's discount is actually good, or sensing that an answer is far too large before you check it.

Keep it sharp: Mental maths ladders daily — no paper — a strength left alone drifts back toward the middle.

LEVEL-UP ZONE

Working Memory

Working Memory — your lowest score today (still ahead of 25 in 100 of Class 6). Not a weakness — simply the ability where practice pays fastest.

Why it matters: This is the skill behind mental arithmetic, remembering a phone number long enough to type it, and following a long instruction without notes.

The plan: 10 minutes a day for 30 days (p. 15). Students who keep it up often move this ability up a full band by next year's test.

Start here: Digit span practice: push forward span to 6

A low zone is not a verdict on Vihaan — it is simply the ability that has had the least practice so far, and the one where effort shows up fastest.

What these mean: your Superpower is simply the ability where you scored highest today. Your Level-up zone is the ability with the most room to grow — practising it gives the fastest improvement, which is why your 30-day plan targets it.

07 · ZONE BY ZONE · WHAT IT MEANS FOR YOU

07 Vihaan Rao (Sample) — zone by zone — what it means for you

ZONE 1 OF 6 · your superpower

Numerical Reasoning

nickname: **Number Ninja**

14 of 14 questions answered

IN REAL LIFE

This is the skill behind estimating whether a shop's discount is actually good, or sensing that an answer is far too large before you check it.

WHAT VIHAAN'S RESULT MEANS

Vihaan scored higher than about 97 of every 100 Class 6 students here — Numerical Reasoning is a genuine strength to build a study style around.

Practice ideas

1. Mental maths ladders daily — no paper
2. Number series puzzles with two-step rules
3. Estimate first, then calculate — how close were you?

Where it pays off: Mathematics, accountancy, economics, data work, engineering entrance exams.

Zone by zone — what it means for you

ZONE 2 OF 6

Logical Reasoning

nickname: **Sequence Surfer**

STRENGTH

Working out what comes next in a series and why — logic that moves in a line.

Top 9%

ROOM TO GROW — STRONG

Exceptionally high	
Very high	
Above average	← Vihaan
Average (upper half)	
Average (lower half)	
Developing	
Still emerging	

This ability sits in **Above average** — compared only with Class 6 students.

14 of 14 questions answered

IN REAL LIFE

This is the skill you use when following multi-step instructions, planning a route, or predicting the next step of an experiment.

WHAT VIHAAN'S RESULT MEANS

Vihaan scored higher than about 91 of every 100 Class 6 students here — Logical Reasoning is a genuine strength to build a study style around.

Practice ideas

1. Number and letter series puzzles daily
2. Board games with turn planning — chess, Ludo strategy
3. Write the steps of a route or recipe in exact order

Where it pays off: Algebra, programming logic, science method, competitive exams.

ZONE 3 OF 6

Visual Perception

nickname: **Eagle Eye**

STRENGTH

Noticing tiny differences and details that most people scan straight past.

Average (upper half)	
Average (lower half)	
Developing	
Still emerging	

This ability sits in **Above average** — compared only with Class 6 students.

14 of 14 questions answered

IN REAL LIFE

This is proofreading power, the eye that catches the one wrong digit in a bill, and the ability to spot what changed in a diagram.

WHAT VIHAAN'S RESULT MEANS

Vihaan scored higher than about 91 of every 100 Class 6 students here — Visual Perception is a genuine strength to build a study style around.

Practice ideas

1. Odd-one-out sets, ten a day
2. Proofread a paragraph: find the three spelling slips
3. Compare two versions of a page — what changed?

Where it pays off: Biology diagrams, geometry, design, medicine, quality-checking work, editing.

ZONE 4 OF 6

Abstract Reasoning

nickname: **Pattern Detective**

SOLID

Spotting the hidden rule inside a grid of shapes — the classic "which figure comes next" puzzle.

Top 32%

ROOM TO GROW — STRONG

This ability sits in **Average (upper half)** — compared only with Class 6 students.

14 of 14 questions answered

IN REAL LIFE

In real life this is the skill behind noticing that a maths problem is the same type you solved last week, or that a story is heading somewhere familiar.

WHAT VIHAAN'S RESULT MEANS

Vihaan is in the solid middle of Class 6 for Abstract Reasoning — ahead of about 68 in 100 students, with clear headroom to grow.

Practice ideas

1. 6×6 Sudoku and simple matrix puzzles daily
2. Spot the rule in a timetable or price list
3. Copy a pattern, then change ONE rule and redraw it

Where it pays off: Mathematics, physics, coding, chess, and any exam with reasoning sections.

ZONE 5 OF 6

Spatial Reasoning

nickname: **Shape Shifter**

SOLID

Rotating and folding shapes in your head without touching them.

Ahead of 42 in 100

ROOM TO GROW — STRONG

BAND · CLASS 6

Exceptionally high	
Very high	
Above average	
Average (upper half)	
Average (lower half) ← Vihaan	
Developing	
Still emerging	

This ability sits in **Average (lower half)** — compared only with Class 6 students.

14 of 14 questions answered

IN REAL LIFE

This is what lets you pack a suitcase efficiently, read a map, or picture how a flat-pack turns into furniture.

WHAT VIHAAN'S RESULT MEANS

Spatial Reasoning is currently Vihaan's biggest opportunity — ahead of about 42 in 100 Class 6 students today. The exercises below are exactly how this number moves.

Practice ideas

1. Mental rotation cards: same or flipped?
2. Net-folding: which box does this flat shape make?
3. Draw your room's map from memory

Where it pays off: Geometry, engineering, architecture, surgery, design, aviation.

Zone by zone — what it means for you

ZONE 6 OF 6 · your level-up zone

Working Memory

nickname: **Memory Master**

FOCUS AREA

Holding several things in mind at once while doing something with them.

Ahead of 25 in 100

Still emerging	

This ability sits in **Average (lower half)** — compared only with Class 6 students.

11 of 11 questions answered

IN REAL LIFE

This is the skill behind mental arithmetic, remembering a phone number long enough to type it, and following a long instruction without notes.

WHAT VIHAAN'S RESULT MEANS

Working Memory is currently Vihaan's biggest opportunity — ahead of about 25 in 100 Class 6 students today. The exercises below are exactly how this number moves.

Practice ideas

1. Digit span practice: push forward span to 6
2. Play back a sequence of taps on the table
3. Three-step mental maths: hold the middle result

Where it pays off: Every subject — this is the workspace all other thinking happens in.

08 · 30-DAY WORKOUT AND 90-DAY PLAN

08 Vihaan Rao (Sample) — your 30-day workout — and the 90-day path

A four-week practice plan written for you, the student, built around your level-up zone — Working Memory.

WEEK 1

Digit-span game — start at 5 digits, add one when you succeed twice.

WEEK 2

Backwards recall: lists, then digits, then instructions.

WEEK 3

Two-step mental sums with nothing written down.

WEEK 4

Mixed: digit span, grid memory and one mental-maths chain daily.

How to use it: ten minutes a day, phone timer on. Each week gets slightly harder on purpose — abilities grow at the edge of comfortable. An unbroken streak beats any single long session.

Nothing to buy: paper and pencil, a deck of cards, a free puzzle app, or the puzzle page of any newspaper.

STREAK TRACKER · TICK A BOX EACH DAY

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
16	17	18	19	20	21	22	23	24	25	26	27	28	29	30

After 30 days — the 90-day path

Then run the same ten minutes at the next ability. Three rounds is 90 days, and by then the first has become habit.

DAYS 1–30

Working Memory

Digit span practice: push forward span to 6

DAYS 31–60

Spatial Reasoning

Mental rotation cards: same or flipped?

DAYS 61–90

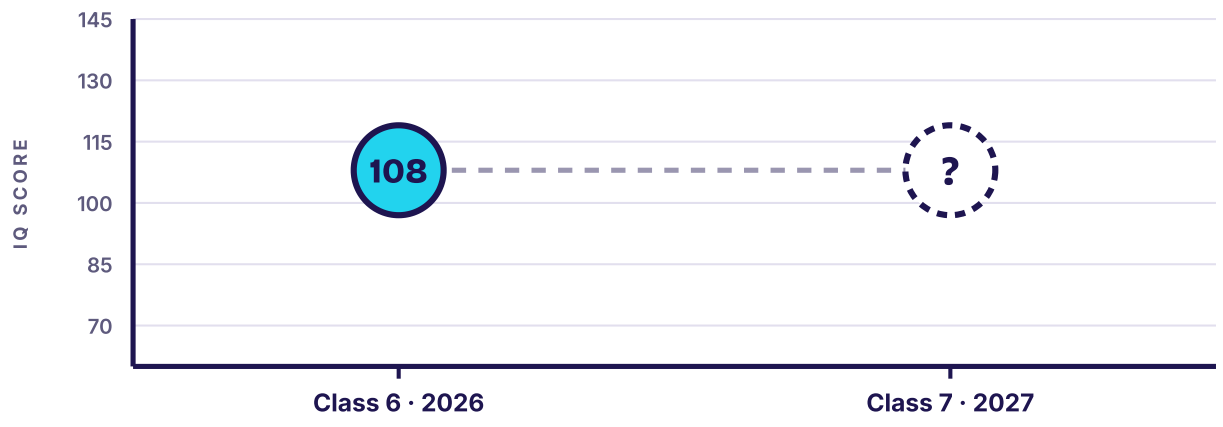

Abstract Reasoning

6×6 Sudoku and simple matrix puzzles daily

Practice sharpens the ability itself — not a shortcut to a bigger number.

09 · YOUR GROWTH STORY

Vihaan Rao (Sample) — your growth story

Take it again next year — this box fills with your own line.

10 · FOR PARENTS

Vihaan Rao (Sample) — for parents — what to actually do

- **Praise the strength by name.** Say: "Your Numerical Reasoning is a real strength." Specific praise works better than "well done".
- **Do the first week together.** The 30-day plan (p. 15) takes 10 minutes a day. Sit with Vihaan for the first few days, then let Vihaan own it.
- **Keep puzzles fun.** They are play, not extra homework. One puzzle a day is enough.
- **Book next year's test now.** Same season next year. Then compare Vihaan only with Vihaan — that line matters more than today's number.
- **Two don'ts.** Don't use the score as a label. Don't compare with siblings or classmates. If anything worries you, talk to the school counsellor.
- **Link it to school.** Point out where the strength already shows up in a subject they like.

11 · FOR THE COUNSELLOR / TEACHER

11 Vihaan Rao (Sample) — for the counsellor / teacher

- **The picture in one line:** strong in Numerical Reasoning (top 3%), needs practice in Working Memory (ahead of 25 in 100). Overall: Average (upper half) for Class 6.
- **In class:** let Vihaan use the strength openly — it builds confidence. Give short, easy practice tasks in Working Memory — the weekly plan (p. 15) can be used as-is.
- **Two check-ins:** ask about the practice plan on day 15 and day 30. That alone doubles follow-through.
- **What next:** retest next season on the Class 7 paper.
- **Age note:** Class 6 is where practice starts to show in results within a term — a good moment for a target.
- **At this age:** pair the strength with a subject choice, and give the growth zone low-stakes repetition.
- **What this result does not license:** it is a screening assessment, not a diagnosis. For any clinical question, refer Vihaan to a psychologist.

Next steps

Start the 30-day workout

Working Memory, ten minutes a day — p. 15.

Add a career-interest test

Pair this ability report with the Ideal Career Test™ on psychometrictest.ai.

Retest next year

Class 7 paper, same season — fill in the growth story on p. 16.
