DAYS 1–30 → Abstract Reasoning

DAYS 31–60 → Working Memory

DAYS 61–90 → Spatial Reasoning

How to read this report

"Ahead of 48 in 100"
How many students out of 100 in Class 8 this result is ahead of.

"Top 3%"
Only about 3 of every 100 Class 8 students scored higher.

"Likely range"
From one sitting, the true level almost certainly falls inside that range.

Strip & marker

ROOM TO GROW — STRONG

Where you sit today, from "room to grow" to "strong".

The 7 bands

Exceptionally high · Very high · Above average · Average (upper half) · Average (lower half) · Developing · Still emerging

Zone tags & colours

STRENGTH · SOLID · FOCUS AREA — Each brain zone keeps its own colour on every page.

01 · THE SCORE, EXPLAINED

01 Arjun Nair (Sample) — IQ Assessment — the score, explained

WHAT IS AN IQ TEST?

An IQ (Intelligence Quotient) cognitive test is a standardized assessment designed to measure a person's mental capabilities, reasoning skills, and intellectual potential relative to their age group.

"Cognitive" only means thinking — noticing, reasoning, remembering.

What this test measured

- **Patterns**— finding the hidden rule in a grid
- **Sequences**— working out what comes next
- **Visual detail**— spotting small differences
- **Numbers**— seeing the pattern inside numbers
- **Shapes**— turning shapes in your head
- **Memory**— holding things in mind while using them

WHAT IT DOES NOT MEASURE

Creativity · Kindness · Humour · Leadership · Effort · Curiosity · Talent

Most of what makes a person good at life is not on this page.

CAN THE SCORE CHANGE?

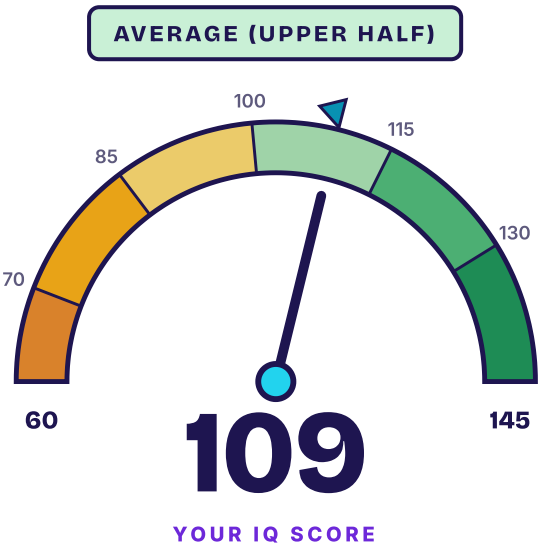

Yes — especially at school age, while the brain is still wiring itself. Puzzles, chess, reading, music and proper sleep all help.

Take the test again next year — and race your own score.

02 · YOUR IQ SCORE

02 Arjun Nair (Sample) — your IQ score

One number that compares your problem solving with students in your own class. The dial shows where today's score sits; the table shows what that band is called.

Such a score is attained by approximately **34.1%** of Class 8 students

Scored only against **Class 8** students

Higher than about **72 out of every 100** Class 8 students.

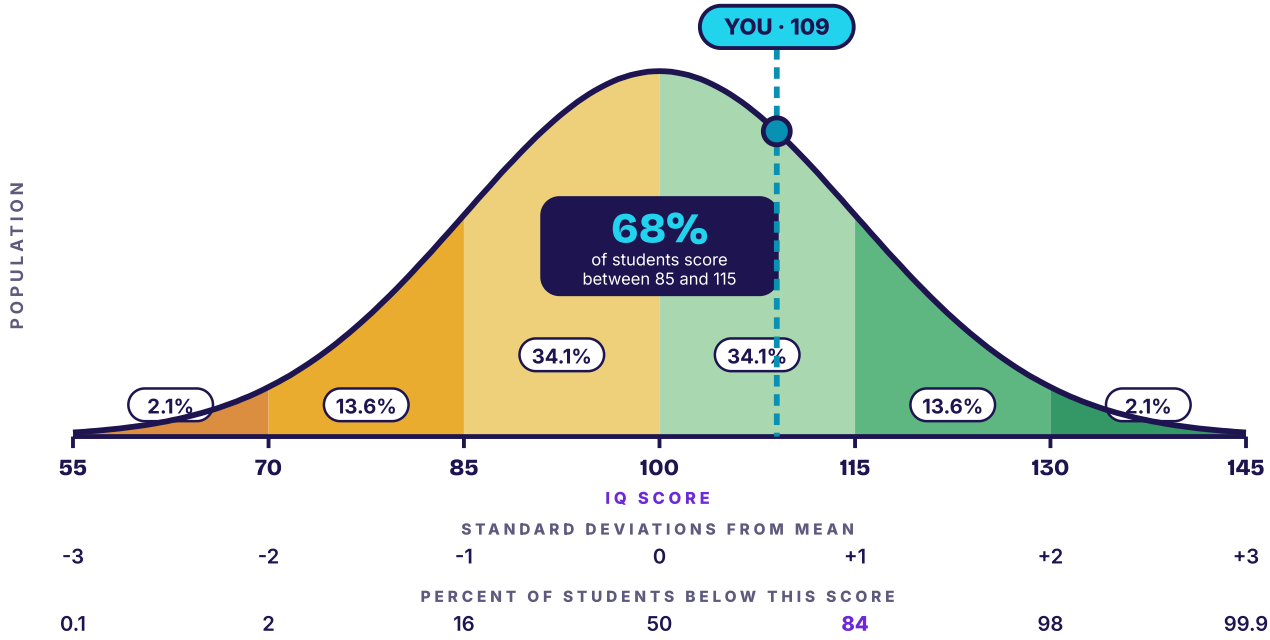

IQ SCORE CLASSIFICATION

SCORE RANGE	WHAT IT'S CALLED	HOW MANY STUDENTS
145+	Exceptionally high	0.1%
130–144	Very high	2.1%
115–129	Above average	13.6%
100–114 ← you	Average (upper half)	34.1%
85–99	Average (lower half)	34.1%
70–84	Developing	13.6%
under 70	Still emerging	2.3%

03 · WHERE YOU STAND

03 Arjun Nair (Sample) — where you stand — the bell curve

Every Class 8 student sits somewhere on this curve. The tall middle is where most people are; the thin tails are the rare scores.

Your marker sits at 109, in the top 28% for Class 8.

About 68 of every 100 students land in the two middle rows — that is what "average" means: the biggest, most crowded part of the curve, not a problem to fix.

ACROSS YOUR 6 BRAIN ZONES:

Visual Perception · top 3%

Attempted all 81 questions

04 · YOUR SCORES AT A GLANCE

04 Arjun Nair (Sample) — your scores at a glance — the formal table

The same numbers a school counsellor or psychologist would read.

SCALE	SCORE	STANDING	LIKELY RANGE	DESCRIPTOR
Overall IQ score	**109** (range 104–114)	Top 28% (72nd percentile)	Top 25%–50%	**Average (upper half)**
Abstract Reasoning TO WORK ON	—	Ahead of 48 in 100 (48th percentile)	Top 50%–75%	Average (lower half)
Logical Reasoning	—	Top 15% (85th percentile)	Top 10%–25%	Above average
Visual Perception STRONGEST	—	Top 3% (97th percentile)	Top 1%–10%	Above average
Numerical Reasoning	—	Top 25% (75th percentile)	Top 25%–50%	Average (upper half)
Spatial Reasoning	—	Top 40% (60th percentile)	Top 25%–50%	Average (upper half)
Working Memory	—	Top 43% (57th percentile)	Top 25%–50%	Average (upper half)

HOW TO READ "STANDING"

"Top 9%" means only about 9 of every 100 Class 8 students scored higher. "Likely range" is the honest version — from one sitting, the true level almost certainly falls inside that range. Any test is a one-day snapshot; sleep, mood and surroundings move it.

05 · YOUR 6 BRAIN ZONES

05 Arjun Nair (Sample) — your 6 brain zones

Each zone is scored separately against your own class. The marker shows where you sit today, and the strip runs from "room to grow" on the left to "strong" on the right.

ABSTRACT REASONING

48 ahead of 48 in 100

ROOM TO GROW — STRONG

Spotting the hidden rule inside a grid of shapes — the classic "which figure comes next" puzzle.

VISUAL PERCEPTION

97 ahead of 97 in 100

ROOM TO GROW — STRONG

Noticing tiny differences and details that most people scan straight past.

SPATIAL REASONING

60 ahead of 60 in 100

ROOM TO GROW — STRONG

Rotating and folding shapes in your head without touching them.

109

IQ SCORE · CLASS 8

LOGICAL REASONING

85 ahead of 85 in 100

ROOM TO GROW — STRONG

Working out what comes next in a series and why — logic that moves in a line.

NUMERICAL REASONING

75 ahead of 75 in 100

ROOM TO GROW — STRONG

Finding the pattern inside numbers — not calculation speed, but number sense.

WORKING MEMORY

57 ahead of 57 in 100

ROOM TO GROW — STRONG

Holding several things in mind at once while doing something with them.

Each number is how many students out of 100 in Class 8 this result is ahead of. The six abilities are measured by the questions answered — this is not a map of the brain, and no part of a score belongs to a part of the head.

06 · SUPERPOWER AND LEVEL-UP ZONE

06 Arjun Nair (Sample) — your superpower and your level-up zone

SUPERPOWER

Visual Perception

Visual Perception — your highest score today: Top 3% of Class 8.

In plain words: noticing tiny differences and details that most people scan straight past.

Use it: choose projects, subjects and hobbies where this shines — Biology diagrams, geometry, design, medicine, quality-checking work, editing.

In everyday life: This is proofreading power, the eye that catches the one wrong digit in a bill, and the ability to spot what changed in a diagram.

Keep it sharp: Mirror vs rotation: sort pairs quickly — a strength left alone drifts back toward the middle.

LEVEL-UP ZONE

Abstract Reasoning

Abstract Reasoning — your lowest score today (still ahead of 48 in 100 of Class 8). Not a weakness — simply the ability where practice pays fastest.

Why it matters: In real life this is the skill behind noticing that a maths problem is the same type you solved last week, or that a story is heading somewhere familiar.

The plan: 10 minutes a day for 30 days (p. 15). Students who keep it up often move this ability up a full band by next year's test.

Start here: 9×9 Sudoku against the clock

A low zone is not a verdict on Arjun — it is simply the ability that has had the least practice so far, and the one where effort shows up fastest.

What these mean: your Superpower is simply the ability where you scored highest today. Your Level-up zone is the ability with the most room to grow — practising it gives the fastest improvement, which is why your 30-day plan targets it.

07 · ZONE BY ZONE · WHAT IT MEANS FOR YOU

07 Arjun Nair (Sample) — zone by zone — what it means for you

Still emerging	

This ability sits in **Above average** — compared only with Class 8 students.

14 of 14 questions answered

IN REAL LIFE

This is proofreading power, the eye that catches the one wrong digit in a bill, and the ability to spot what changed in a diagram.

WHAT ARJUN'S RESULT MEANS

Arjun scored higher than about 97 of every 100 Class 8 students here — Visual Perception is a genuine strength to build a study style around.

Practice ideas

1. Mirror vs rotation: sort pairs quickly
2. Proofread numbers: spot the changed digit in a row
3. Detail scan: two near-identical figures, one difference

Where it pays off: Biology diagrams, geometry, design, medicine, quality-checking work, editing.

ZONE 2 OF 6

Logical Reasoning

nickname: **Sequence Surfer**

STRENGTH

Working out what comes next in a series and why — logic that moves in a line.

Top 15%

Average (upper half)	
Average (lower half)	
Developing	
Still emerging	

This ability sits in **Above average** — compared only with Class 8 students.

14 of 14 questions answered

IN REAL LIFE

This is the skill you use when following multi-step instructions, planning a route, or predicting the next step of an experiment.

WHAT ARJUN'S RESULT MEANS

Arjun is comfortably ahead of most of Class 8 in Logical Reasoning — higher than about 85 in 100 students. Regular light practice keeps this climbing.

Practice ideas

1. Two-step series: ×2 then −1 — find combined rules
2. Chess: plan two moves ahead before touching a piece
3. Break a school project into ordered steps with dates

Where it pays off: Algebra, programming logic, science method, competitive exams.

Zone by zone — what it means for you

ZONE 3 OF 6

Numerical Reasoning

nickname: **Number Ninja**

STRENGTH

Finding the pattern inside numbers — not calculation speed, but number sense.

This ability sits in **Average (upper half)** — compared only with Class 8 students.

14 of 14 questions answered

IN REAL LIFE

This is the skill behind estimating whether a shop's discount is actually good, or sensing that an answer is far too large before you check it.

WHAT ARJUN'S RESULT MEANS

Arjun is comfortably ahead of most of Class 8 in Numerical Reasoning — higher than about 75 in 100 students. Regular light practice keeps this climbing.

Practice ideas

1. Fraction–decimal–percent conversions at speed
2. Two-step series: ×2 −1 patterns
3. Estimate bills and distances, then verify

Where it pays off: Mathematics, accountancy, economics, data work, engineering entrance exams.

ZONE 4 OF 6

Spatial Reasoning

nickname: **Shape Shifter**

SOLID

Rotating and folding shapes in your head without touching them.

Average (upper half) ← Arjun	
Average (lower half)	
Developing	
Still emerging	

This ability sits in **Average (upper half)** — compared only with Class 8 students.

14 of 14 questions answered

IN REAL LIFE

This is what lets you pack a suitcase efficiently, read a map, or picture how a flat-pack turns into furniture.

WHAT ARJUN'S RESULT MEANS

Arjun is in the solid middle of Class 8 for Spatial Reasoning — ahead of about 60 in 100 students, with clear headroom to grow.

Practice ideas

1. Net → solid questions: which cube folds from this?
2. Cross-sections: cut a shape, predict the face
3. Map reading: rotate the map in your head, not in your hands

Where it pays off: Geometry, engineering, architecture, surgery, design, aviation.

ZONE 5 OF 6

Working Memory

nickname: **Memory Master**

SOLID

Holding several things in mind at once while doing something with them.

Top 43%

ROOM TO GROW — STRONG

BAND · CLASS 8

Exceptionally high	
Very high	
Above average	
Average (upper half)	← Arjun
Average (lower half)	
Developing	
Still emerging	

This ability sits in **Average (upper half)** — compared only with Class 8 students.

11 of 11 questions answered

IN REAL LIFE

This is the skill behind mental arithmetic, remembering a phone number long enough to type it, and following a long instruction without notes.

WHAT ARJUN'S RESULT MEANS

Arjun is in the solid middle of Class 8 for Working Memory — ahead of about 57 in 100 students, with clear headroom to grow.

Practice ideas

1. Backward span 5 → 6 — track it weekly
2. Mental maths with held intermediate steps
3. Recall yesterday's timetable in exact order

Where it pays off: Every subject — this is the workspace all other thinking happens in.

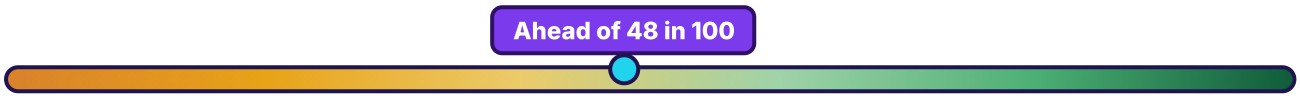

ZONE 6 OF 6 · your level-up zone

Abstract Reasoning

nickname: **Pattern Detective**

SOLID

Spotting the hidden rule inside a grid of shapes — the classic "which figure comes next" puzzle.

BAND · CLASS 8

- Exceptionally high
- Very high
- Above average
- Average (upper half)
- **Average (lower half)** ← Arjun
- Developing
- Still emerging

This ability sits in **Average (lower half)** — compared only with Class 8 students.

14 of 14 questions answered

IN REAL LIFE

In real life this is the skill behind noticing that a maths problem is the same type you solved last week, or that a story is heading somewhere familiar.

WHAT ARJUN'S RESULT MEANS

Abstract Reasoning is currently Arjun's biggest opportunity — ahead of about 48 in 100 Class 8 students today. The exercises below are exactly how this number moves.

Practice ideas

1. 9×9 Sudoku against the clock
2. Two-rule patterns: shape AND count changing together
3. Explain a matrix puzzle's rule to someone in one sentence

Where it pays off: Mathematics, physics, coding, chess, and any exam with reasoning sections.

08 · 30-DAY WORKOUT AND 90-DAY PLAN

08 Arjun Nair (Sample) — your 30-day workout — and the 90-day path

A four-week practice plan written for you, the student, built around your level-up zone — Abstract Reasoning.

WEEK 1

Easy matrix puzzles — 10 a day. Say the rule out loud before choosing.

WEEK 2

Move to 3×3 grids with two rules at once (shape AND shading).

WEEK 3

Add Sudoku, one grid a day, timed.

WEEK 4

Mixed set — matrices, Sudoku and one 'find the rule' from real life daily.

How to use it: ten minutes a day, phone timer on. Each week gets slightly harder on purpose — abilities grow at the edge of comfortable. An unbroken streak beats any single long session.

Nothing to buy: paper and pencil, a deck of cards, a free puzzle app, or the puzzle page of any newspaper.

STREAK TRACKER · TICK A BOX EACH DAY

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
16	17	18	19	20	21	22	23	24	25	26	27	28	29	30

After 30 days — the 90-day path

Then run the same ten minutes at the next ability. Three rounds is 90 days, and by then the first has become habit.

DAYS 1–30

Abstract Reasoning

9×9 Sudoku against the clock

DAYS 31–60

Working Memory

Backward span 5 → 6 — track it weekly

DAYS 61–90

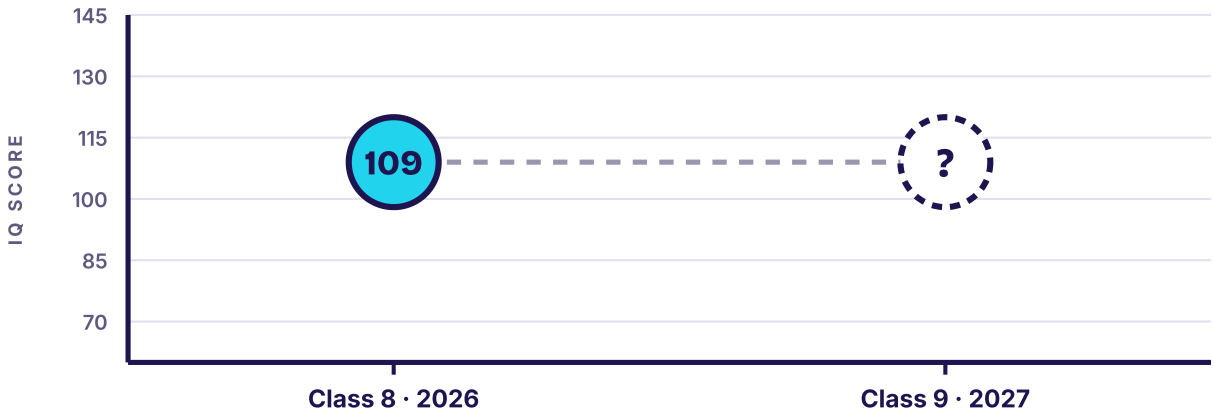

Spatial Reasoning

Net → solid questions: which cube folds from this?

Practice sharpens the ability itself — not a shortcut to a bigger number.

09 · YOUR GROWTH STORY

Arjun Nair (Sample) — your growth story

Take it again next year — this box fills with your own line.

10 · FOR PARENTS

Arjun Nair (Sample) — for parents — what to actually do

- **Praise the strength by name.** Say: "Your Visual Perception is a real strength." Specific praise works better than "well done".
- **Do the first week together.** The 30-day plan (p. 15) takes 10 minutes a day. Sit with Arjun for the first few days, then let Arjun own it.
- **Keep puzzles fun.** They are play, not extra homework. One puzzle a day is enough.
- **Book next year's test now.** Same season next year. Then compare Arjun only with Arjun — that line matters more than today's number.
- **Two don'ts.** Don't use the score as a label. Don't compare with siblings or classmates. If anything worries you, talk to the school counsellor.
- **Link it to school.** Point out where the strength already shows up in a subject they like.

11 · FOR THE COUNSELLOR / TEACHER

11 Arjun Nair (Sample) — for the counsellor / teacher

- **The picture in one line:** strong in Visual Perception (top 3%), needs practice in Abstract Reasoning (ahead of 48 in 100). Overall: Average (upper half) for Class 8.
- **In class:** let Arjun use the strength openly — it builds confidence. Give short, easy practice tasks in Abstract Reasoning — the weekly plan (p. 15) can be used as-is.
- **Two check-ins:** ask about the practice plan on day 15 and day 30. That alone doubles follow-through.
- **What next:** retest next season on the Class 9 paper.
- **Age note:** Class 8 is where practice starts to show in results within a term — a good moment for a target.
- **At this age:** pair the strength with a subject choice, and give the growth zone low-stakes repetition.
- **What this result does not license:** it is a screening assessment, not a diagnosis. For any clinical question, refer Arjun to a psychologist.

Next steps

Start the 30-day workout

Abstract Reasoning, ten minutes a day — p. 15.

Add a career-interest test

Pair this ability report with the Ideal Career Test™ on psychometrictest.ai.

Retest next year

Class 9 paper, same season — fill in the growth story on p. 16.
